Subject: Microsoft Settlement

The settlement is fair. Please end the disruption in the tech industry and economy. Microsoft has changed this world with its technology and has made it VERY easy and cost effective to run a business on their software. Microsoft and all of the Independent Software Vendors make up a no small part of this country's and this world's economy. This is a good thing! This frivolous lawsuit brought by competitors that choose rhetoric and the anti-trust courts as a method of competition instead of spending their time and money making compelling software is a monumental waste of taxpayers dollars and is one main reason for the current economic slump. End it now by approving the settlement!! Please understand the enormous amount of good that this company has done. As a small business owner it is amazingly wonderful to have a ton of choices of software to run my business that all work on Windows.
